Drive

Compact, quiet, gearless, energy-efficient, inverter-drive permanent-magnet motor electrical machine.

Solid doors

Extra robust doors which improve sound-proofing inside and outside the lift and which are specially sized for an intense flow of people.

Parametric / Flexible

The parametric dimensions offer the possibility of adapting the lift to most potential space-based needs (optional).

Accessible space below the pit

Adapts the lift to suit buildings requiring an accessible space below the pit (optional).

Robust lift car

Provides greater lift comfort, reducing vibration and noise during lift travel.

Traction ropes

They replace traditional steel ropes. As a result of their lighter weight, longer lifespan and greater flexibility, it is possible to use a more compact machine with a more efficient and eco-friendly motor.

Cars

Special car dimensions, with extra depth and wider doors. Designed with reinforced panels and floors for multiple and intensive uses.

Two-Way Communication

Between the car and the 24-hour Service Call Centre, in line with EN 81-28.

Automatic rescue system

With floor level indication to ensure fast, efficient and safe evacuation of passengers in the event of an emergency. As an option, the system can incorporate a fully-automatic rescue device to evacuate passengers in the event of a power failure.
